E2 — Climate Change and Sustainable Cities — Evaluation Questions

Question ID	Question Type	Language	Question	Ground Truth Section
E2-Q01	Direct / Factual	English	Which greenhouse gas is most notably released by burning fossil fuels?	Understanding Climate Change
E2-Q02	Direct / Factual	English	What is the urban heat island effect?	Cities and Their Environmental Impact
E2-Q03	Direct / Factual	English	What process can convert organic waste into energy?	Waste Management and Circular Economy
E2-Q04	Direct / Factual	English	Name two measures that improve energy efficiency in buildings.	Renewable Energy and Efficiency
E2-Q05	Direct / Factual	English	What does climate resilience refer to in the context of cities?	Climate Resilience and Adaptation
E2-Q06	Semantic / Paraphrased	English	How does designing neighborhoods with nearby daily amenities help cut emissions?	Sustainable Urban Planning
E2-Q07	Semantic / Paraphrased	English	In what ways can trees and parks help cool down a city?	Green Spaces and Urban Nature
E2-Q08	Semantic / Paraphrased	English	How can shifting away from private cars lower a city's carbon output?	Sustainable Transportation
E2-Q09	Semantic / Paraphrased	English	Why is it beneficial to keep reusing materials instead of throwing them away?	Waste Management and Circular Economy
E2-Q10	Semantic / Paraphrased	English	How can a city prepare to cope with floods and extreme weather?	Climate Resilience and Adaptation
E2-Q11	Semantic / Paraphrased	English	Why is residents' involvement important for a city's sustainability efforts to succeed?	Governance and Community Participation
E2-Q12	Conceptual	English	Why are cities considered both major causes of and key solutions to climate change?	Cities and Their Environmental Impact; Introduction

Question ID	Question Type	Language	Question	Ground Truth Section
E2-Q13	Conceptual	English	Why can even small efficiency improvements in cities produce large emission reductions?	Cities and Their Environmental Impact
E2-Q14	Conceptual	English	Why must sustainable cities pursue both reducing emissions and adapting to climate impacts?	Climate Resilience and Adaptation
E2-Q15	Conceptual	English	Why is top-down policy alone insufficient to achieve sustainable cities?	Governance and Community Participation
E2-Q16	Cross-lingual	Bangla	কমপ্যাক্ট ও মিশ্র-ব্যবহারের নগর পরিকল্পনা কীভাবে যানবাহনের ওপর নির্ভরতা কমায়?	Sustainable Urban Planning
E2-Q17	Cross-lingual	Bangla	নবায়নযোগ্য জ্বালানি ও শক্তি সাশ্রয় কীভাবে শহরের কার্বন নিঃসরণ কমায়?	Renewable Energy and Efficiency
E2-Q18	Cross-lingual	Bangla	সবুজ স্থান বা পার্ক কীভাবে শহরের পরিবেশগত সমস্যার সমাধানে সহায়তা করে?	Green Spaces and Urban Nature
E2-Q19	Cross-lingual	Bangla	টেকসই পরিবহন ব্যবস্থা কীভাবে শহরের বায়ুদূষণ ও নিঃসরণ কমায়?	Sustainable Transportation
E2-Q20	Cross-lingual	Bangla	সার্কুলার ইকোনমি ধারণা কীভাবে বর্জ্য ও দূষণ কমাতে সাহায্য করে?	Waste Management and Circular Economy
E2-Q21	Cross-lingual	Bangla	জলবায়ু পরিবর্তনের প্রভাব মোকাবিলায় শহরগুলোকে কীভাবে সহনশীল করা যায়?	Climate Resilience and Adaptation
E2-Q22	Multi-hop / Comparative	English	How do sustainable transportation and renewable energy together reduce a city's overall carbon footprint?	Sustainable Transportation; Renewable Energy and Efficiency
E2-Q23	Multi-hop / Comparative	English	How can green spaces both cool a city and reduce the risk of urban flooding?	Green Spaces and Urban Nature; Climate Resilience and Adaptation

Question ID	Question Type	Language	Question	Ground Truth Section
E2-Q24	Challenging / Indirect	English	Why does covering land with concrete and asphalt tend to raise a city's energy demand?	Cities and Their Environmental Impact
E2-Q25	Challenging / Indirect	English	Why might discarding materials in landfills accelerate global warming more than reusing them?	Waste Management and Circular Economy
